Docuware keyword

When I enter some keywords and save theme in Docuware
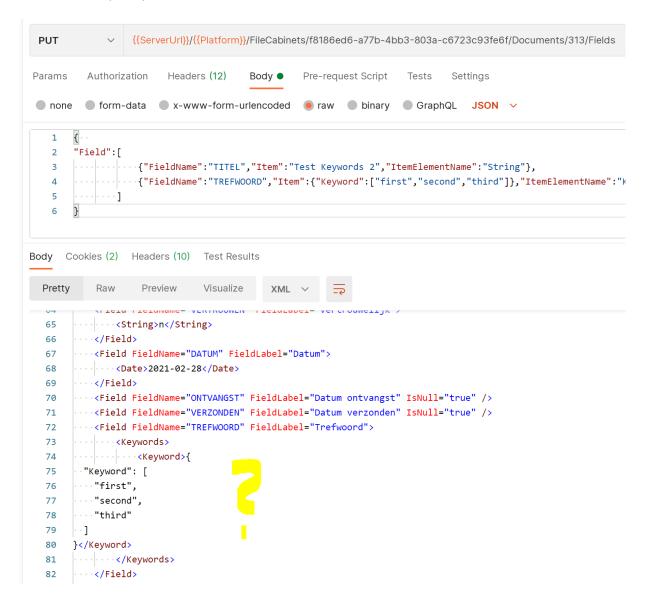

Status	Nieuw
Trefwoord	*Een nieuwe ingang toevoegen*
	first
	second
	third

I request the fields with the REST api and see this response

```
70      ····<Field FieldName="ONTVANGST" FieldLabel="Datum ontvangst" IsNull="true" />
71      ····<Field FieldName="VERZONDEN" FieldLabel="Datum verzonden" IsNull="true" />
72      ····<Field FieldName="TREFWOORD" FieldLabel="Trefwoord">
73      ·········<Keywords>
74      ·············<Keyword>first</Keyword>
75      ·············<Keyword>second</Keyword>
76      ·············<Keyword>third</Keyword>
77      ·········</Keywords>
78      ····</Field>
```

Good!

In Postman I try to update some fields

PUT   {{ServerUrl}}/{{Platform}}/FileCabinets/f8186ed6-a77b-4bb3-803a-c6723c93fe6f/Documents/313/Fields

Params   Authorization   Headers (12)   Body ●   Pre-request Script   Tests   Settings

● none   ● form-data   ● x-www-form-urlencoded   ● raw   ● binary   ● GraphQL   JSON ⌄

```
1  {
2  "Field":[
3           {"FieldName":"TITEL","Item":"Test Keywords 2","ItemElementName":"String"},
4           {"FieldName":"TREFWOORD","Item":{"Keyword":["first","second","third"]},"ItemElementName":"k
5           ]
6  }
```

Body   Cookies (2)   Headers (10)   Test Results

Pretty   Raw   Preview   Visualize   XML ⌄

```
64      <Field FieldName="VERTROUWEN" FieldLabel="Vertrouwelijk">
65           <String>n</String>
66      </Field>
67      <Field FieldName="DATUM" FieldLabel="Datum">
68           <Date>2021-02-28</Date>
69      </Field>
70      <Field FieldName="ONTVANGST" FieldLabel="Datum ontvangst" IsNull="true" />
71      <Field FieldName="VERZONDEN" FieldLabel="Datum verzonden" IsNull="true" />
72      <Field FieldName="TREFWOORD" FieldLabel="Trefwoord">
73           <Keywords>
74                <Keyword>{
75  "Keyword": [
76      "first",
77      "second",
78      "third"
79  ]
80  }</Keyword>
81           </Keywords>
82      </Field>
```

Response is crazy and in Docuware it show like

Status	Nieuw
Trefwoord	*Een nieuwe ingang toevoegen*
	{ "Keyword": ["first", "second", "third"] }

Wat must be he syntax here:

```json
{"FieldName":"TREFWOORD","Item":{"Keyword":["first","second","third"]},"ItemElementName":"Keywords"}
```

Only adding <u>one</u> Keyword like this works:

```json
{"FieldName":"TREFWOORD","Item":"first","ItemElementName":"Keywords"}
```

```xml
<Field FieldName="VERZONDEN" FieldLabel="Datum verzonden" IsNull="true
<Field FieldName="TREFWOORD" FieldLabel="Trefwoord">
    <Keywords>
        <Keyword>first</Keyword>
    </Keywords>
</Field>
```

Like this no go

```json
2   "Field":[
3       {"FieldName":"TITEL","Item":"Test Keywords 2","ItemElementName":"String"},
4       {"FieldName":"TREFWOORD","Item":["first","second"],"ItemElementName":"Keywords"}
5   ]
6   }
```

dy   Cookies (2)   Headers (10)   Test Results

Pretty   Raw   Preview   Visualize   XML ⌄

```xml
62          <String>NL</String>
63      </Field>
64      <Field FieldName="VERTROUWEN" FieldLabel="Vertrouwelijk">
65          <String>n</String>
66      </Field>
67      <Field FieldName="DATUM" FieldLabel="Datum">
68          <Date>2021-02-28</Date>
69      </Field>
70      <Field FieldName="ONTVANGST" FieldLabel="Datum ontvangst" IsNull="true" />
71      <Field FieldName="VERZONDEN" FieldLabel="Datum verzonden" IsNull="true" />
72      <Field FieldName="TREFWOORD" FieldLabel="Trefwoord">
73          <Keywords>
74              <Keyword>[
75      "first",
76      "second"
77  ]</Keyword>
78          </Keywords>
```

Any idea's what we must send to get multiple keywords in a RESTY call??
